DETAILED ACTION

Response to Amendment

1. Applicant's amendment was received on 12/20/04, and has been entered and made of record. Currently, **claims 2-4, 15, 22, 24, 31, and 33** are pending.

Allowable Subject Matter

2. **Claims 2-4, 15, 22, 24, 31, and 33** are allowed (**renumbered as claims 2-4, 1, 6, 7, 5, and 8, respectively**).

3. The following is an examiner's statement of reasons for allowance:

Regarding independent *claims 15, 22, and 24 (renumbered claims 1, 6, and 7, respectively)*, in the examiner's opinion, it would not have been obvious to one of ordinary skill in the art to have the system, as claimed, include the features of locating a communication mark on a medium at a final addressee destination, wherein a first address for a first communication mode and a second address for a second different type of communication mode are obtained from the communication mark, and subsequently, determining whether a first communication address is available, and when it is not, using the second communication address. The closest prior art, previously indicated as Witek (U.S. Patent Number 5,461,488), and the newly cited reference of Albal (U.S. Patent Number 5,826,034), both fail to specifically teach these features. Particularly, Witek discloses a system that locates and obtains a communication mark on a received medium. However, Witek fails to teach if the communication address is different than the final addressee destination that received the medium from the sending party. Albal discloses

Art Unit: 2622

a system that allows a message sender to select a primary communication mode, along with tertiary communication modes if the primary communication mode is unavailable. However, Albal fails to expressly disclose of locating a communication mark to obtain a communication address on a medium at a final addressee destination sent from the sending party. For these reasons, the claims are rendered allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation of Pertinent Prior Art

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Albal (U.S. Patent Number 5,826,034) discloses a system that allows a message sender to select primary and tertiary communication modes.
